003 - 01 THE PIAGUE OF 1894 / 1894年的皮雅格

Table of Contents

1. THE PIAGUE OF 1894 / 1894年的皮雅格

---

1. THE PIAGUE OF 1894 / 1894年的皮雅格

In May 1894, Hong Kong **was stricken (a.)使遭受痛苦；使受灾 with** bubonic 腹股沟腺炎的；鼠疫的 plague 瘟疫；疫病 后定说明 believed to have originated (v.) in Canton, where some *one hundred thousand* 一百个百,十万 people died.

Example 1. 案例
stricken

(a.)
1.**~ (with/by sth)** : seriously affected by an unpleasant feeling or disease or by a difficult situation 受煎熬的；患病的；遭受挫折的
•She raised (v.) *her stricken (a.) face* and begged for help. 她仰起苦闷的脸，乞求帮助。
•Whole villages **were stricken (a.) with the disease**. 整村整村的人染上了这种病。
•**He was stricken (a.) by a heart attack** on his fiftieth birthday. 他在五十岁生日那天心脏病发作。
•We went to the aid of *the stricken (a.) boat*. 我们前去救助那艘失事的船。

2.(in compounds 构成复合词) seriously affected by the thing mentioned 遭受...的；受...之困的
•*poverty-stricken (a.) families* 贫困家庭

——see also grief-stricken, horror-struck, panic-stricken

→ 来自 strike (击，撞) 的过去分词古拼写形式，引申比喻义受煎熬的，遭受痛苦的。

主 The known *death toll* (n.) (事故、灾难、战争等的) 死亡人数 in the colony over the next five months 系 was more than twenty-five hundred, mainly among the Chinese lower classes.

Governor William Robinson **reported** on May 17 **that** /the plague **was "entirely confined (v.) to** the poorer classes of Chinese."

The colonial government 谓 responded (v.) by **conducting (v.) house-to-house searches** for *infected (a.) people* /**and quarantining** (v.)对...进行检疫，对...进行隔离 victims 受害者；患者 **on board** the Hygeia 司健康的女神, a hospital ship 后定说明 supervised (v.)监督；管理 by European doctors.

殖民政府的应对措施, 是挨家挨户搜查感染者，并将患者隔离在“海吉亚号”上，这是一艘由欧洲医生监管的医院船。

Example 2. 案例
Hygeia

(n.) the Greek goddess of health 海吉亚; 健康女神

许癸厄亚（Hygieia）是古希腊神话中的**健康、卫生与福祉女神，**也是医神阿斯克勒庇俄斯之女。她通常被描绘为一位用碗喂蛇的少女，象征着预防和洁净，其名是现代英语“卫生”（hygiene）的语源。在医学史上，她是阿波罗及阿斯克勒庇俄斯的伴神，在古代医者誓词中占有重要地位。

许癸厄亚主司健康与预防，在雅典大瘟疫（公元前429年）后，她作为健康女神的崇拜得到广泛传播。

她是阿斯克勒庇俄斯与拉姆佩蒂亚的女儿，通常被认为是阿波罗的孙女。**她常与姐妹"帕那刻亚"（Panacea，治愈女神）一起出现。**

她常被塑造为手持蛇（象征智慧与更新）和碗（象征药剂）的年轻少女，即著名的“许癸厄亚之碗”。

第10号小行星健神星（10 Hygiea）以她命名。

These plague measures **met (v.) with** great resistance 抵抗；反抗 from much of the Chinese community.

Many Chinese distrusted (v.)不信任；怀疑 Western medicine, with its emphasis 重点；强调 on disinfection 消毒；杀菌 and surgery 外科手术.

Example 3. 案例

这个 with 引导的介词短语 with its emphasis on disinfection and surgery **在句中充当状语，具体说明西方医学所具有的特征，**相当于一个非限制性定语从句的简化形式。

Resenting (v.)愤恨；不满 house-to-house searches by male inspectors 检查员；视察员, which they considered (v.) a violation of women’s privacy, some residents hid (v.) their sick relatives 亲属 from the inspectors.

Approximately 大约；大概 eighty thousand people left (v.) Hong Kong during the epidemic (n.a.)流行病；传染病.

All sorts of rumors spread (v.): doctors **were cutting (v.) open** pregnant (a.) women and **gouging (v.)挖；凿 out** their babies’ eyes to make medicine; the government was planning ① to select (v.) children from local schools /② and surgically 外科手术地 remove (v.) their livers 肝脏 to obtain (v.) bile 胆汁, *the only known cure* (疗法；解药)唯一已知的疗法, ③ **and to send** any child *with the slightest pimple 丘疹；小脓疱 or boil* 疖；疮肿 **to** the Hygeia.

各种谣言四起：医生们在剖开孕妇 (的肚子) 并挖出她们婴儿的眼睛 (这些行为) 是为了制药；政府正计划从本地学校挑选儿童, (并) 手术摘除他们的肝脏以获取胆汁 (胆汁是唯一已知的疗法)，并将任何 (身上带有) 最轻微丘疹或疖子的孩子送往健康号 (医院船)。

Example 4. 案例

冒号引出对“谣言”的总述。

分号连接两个并列的"同位语从句"，分别详述两种不同类型的谣言（一是医生行为，二是政府计划），使长句结构清晰。

```

gouge

(v.)
1.**~ sth (in sth)** : **to make a hole or cut** in sth /with a sharp object /in a rough or violent way 凿
•The lion’s claws (n.) **had gouged (v.) a wound** in the horse’s side. 狮爪在马身一侧抓了一道深口。
•He **had gouged (v.) her cheek** with a screwdriver. 他用螺丝起子, 戳她的脸颊。

2.(NAmE) to force sb to pay an unfairly high price for sth; to raise prices unfairly 敲（某人）的竹杠；（向某人）诈骗钱财，漫天要价
•**Price gouging** is widespread. 漫天要价的情况普遍存在。

(n.)
1.a sharp tool for making hollow areas in wood 凿子

2.a deep, narrow hole or cut in a surface 凿成的槽（或孔、洞）

→ 来自拉丁语 gulbia, 凿。可能进一步来自PIE*skel, 砍，切，词源同 scale, coup (政变). 字母l软化u.

pimple

(n.) *a small raised red spot* on the skin 丘疹；粉刺；小脓包

→ 可能来自 pap,乳头，词源同 papilla (乳头；小乳头状突起) ,乳头状突起，丘疹。-le,小词后缀。

boil

(n.)
[sing.]a period of boiling; the point at which liquid boils 沸腾；沸点
[C] *a painful infected swelling* (n.)肿块，肿胀处 under the skin which is full of a thick yellow liquid (called pus) 疖；皮下脓肿；黄水疮

Placards 标语牌；布告 in Canton warned (v.) people against going to Hong Kong, where Western doctors **were** allegedly 据说；据称 **cutting up** 切碎，切开，割开 Chinese women and children.

The colonial government issued (v.)发布；颁布 its own proclamations 公告；宣言, warning inhabitants 居民；住户 not to believe such “wild and baseless (a.)毫无根据的 rumours.”

The Tung Wah Hospital Committee 东华医院委员会 was divided.
Some committee members resisted (v.)抵制；抵抗 the government’s plague measures; others openly supported (v.) the government and criticized (v.)批评；指责 the Chinese for not complying 遵从；服从.

Example 5. 案例

In May 1894, Hong Kong was stricken with bubonic plague believed to have originated in Canton, where some one hundred thousand people died.
The known death toll in the colony over the next five months was more than twenty-five hundred, mainly among the Chinese lower classes.
Governor William Robinson reported on May 17 that the plague was “entirely confined to the poorer classes of Chinese.” 1 The colonial government responded by conducting house-to-house searches for infected people and quarantining victims on board the Hygeia, a hospital ship supervised by European doctors.
These plague measures met with great resistance from much of the Chinese community. Many Chinese distrusted Western medicine, with its emphasis on disinfection and surgery. Resenting house-to-house searches by male inspectors, which they considered a violation

of women’s privacy, some residents hid their sick relatives from the inspectors. Approximately eighty thousand people left Hong Kong during the epidemic.
All sorts of rumors spread: doctors were cutting open pregnant women and gouging out their babies’ eyes to make medicine; the government was planning to select children from local schools and surgically remove their livers to obtain bile, the only known cure, and to send any child with the slightest pimple or boil to the Hygeia.
Placards in Canton warned people against going to Hong Kong, where Western doctors were allegedly cutting up Chinese women and children.
The colonial government issued its own proclamations, warning inhabitants not to believe such “wild and baseless rumours.” 2 The Tung Wah Hospital Committee was divided. Some committee members resisted the government’s plague measures; others openly supported the government and criticized the Chinese for not complying. 1894 年 5 月, 香港爆发鼠疫, 据信起源于广州, 造成约十万人死亡。在接下来的五个月里, 香港已知的死亡人数超过两千五百人, 主要集中在华人下层阶级。总督威廉·罗宾逊于 5 月 17 日报告称, 鼠疫“完全局限于华人贫苦阶层”。 殖民政府的应对措施是挨家挨户搜查感染者, 并将患者隔离在由欧洲医生监管的医院船 “海吉亚号” 上。这些防疫措施遭到了华人社区的强烈抵制。 许多华人不信任西医, 因为西医强调消毒和手术。一些居民对男性检查员挨家挨户的搜查感到不满, 认为这是对女性隐私的侵犯, 因此将患病的亲属藏匿起来, 不让检查员发现。疫情期间, 约有八万人离开香港。各种谣言四起：医生剖开孕妇的肚子, 挖出婴儿的眼睛来制药；政府计划从当地学校挑选儿童, 切除他们的肝脏以获取胆汁——当时唯一已知的治疗方法——并将任何长了小疙瘩或疖子的孩子送到 “海吉亚号”上。 广州的告示牌警告人们不要去香港, 因为据说西方医生在那里对中国妇女和儿童进行手术。殖民政府发布公告, 警告居民不要相信这种“毫无根据的谣言”。2 东华医院委员会内部出现分歧。 一些委员会成员抵制政府的防疫措施；另一些人则公开支持政府, 并批评中国不遵守规定。

Europeans generally **dismissed** (v.)不考虑，不理会；驳回 this resistance to the government’s plague measures **as** xenophobia (n.)仇外；恐外, superstition 迷信, and hostility 敌意；敌对 toward Western medicine, but the situation was considerably 相当地；非常地 more complex.

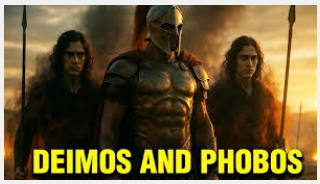
欧洲人通常将这种对政府鼠疫措施的抵制, 视为仇外心理、迷信, 和对西方医学的敌意，但情况要复杂得多。

Example 6. 案例
xenophobia

(n.) [U] (disapproving) a strong feeling of dislike or fear of people from other countries 仇外，惧外（对外国人的厌恶或惧怕）

→ xeno-,外国人，-phobia (恐怖症，恐惧症（无名的极度恐惧）),仇视，词源同 claustrophobia ([心理] 幽闭恐怖症).

→ phobia : 在希腊神话中，战神在战场上往往有他的两个儿子伴随在左右，一个叫做 Phobos（福波斯），一个叫做 Deimos（德摩斯），这哥俩的名字在希腊语中都是“惊恐、恐惧”的意思，代表了战争的恐怖。英语单词phobia就 源自福波斯的名字phobos，表示“恐怖”之意，还可以作为词根，用来表示各种恐惧症。 phobia：['fəʊbɪə]n.恐怖，恐惧症



Like most colonial governments, the Hong Kong government had never **taken such an interventionist 干涉主义的；干预性的 role** in colonial medicine and public health.

Until the mid-1800s, colonial medicine **had been concerned (v.)与...有关；涉及 mainly with** protecting (v.) Europeans from *the harmful effects* of their tropical 热带的 environments.

Only after *the bacteriological 细菌学的 revolution* of the late 1800s /**was** disease **associated with** contagious 传染的；传染性的 persons **rather than with** unhealthy tropical environments.

只有在19世纪晚期细菌学革命之后，疾病才与"具有传染性的人"联系起来，而不是与"不健康的热带环境"联系起来。

Example 7. 案例

当“Only + 状语”（此处是Only after...这个时间状语）置于句首时，句子需要进行部分倒装，即将助动词/情态动词/系动词, 提前到主语之前。

句中谓语是 was associated（系动词was+ 过去分词associated）。
倒装时，只需将系动词was 提前到主语 disease之前，构成 **was** disease **associated**。

原正常语序是： Disease **was associated with** ... **only after** the bacteriological revolution of the late 1800s.

In response to 作为回应 *an 1882 report* (n.) by Osbert Chadwick, an engineer 后定说明 sent (v.) by the British government **to examine (v.) health and sanitary (a.)公共卫生的 conditions** in Hong Kong, in 1883 the colonial government established (v.) the Sanitary Board 卫生委员会, which was given the power to inspect (v.)检查；视察 and disinfect (v.) 给...消毒,给...杀菌 private homes /and to quarantine (v.)对.....进行隔离 contagious (a.)（疾病）接触性传染的 persons in hospitals.

为响应英国政府派往香港考察卫生和公共卫生状况的工程师奥斯伯特·查德威克于1882年提交的报告，殖民政府于1883年成立了卫生委员会，该委员会被赋予"检查和消毒私人住宅, 以及将传染病患者隔离在医院"的权力。

Example 8. 案例
quarantine

(v.)[VN] to put an animal or a person into quarantine （对动物或人）进行检疫，隔离 → 来自拉丁语quadraginta,四十，来自quadr-,四，-gin,十，词源同ten,dean.现词义来自17世纪意大利威尼斯港对来自瘟疫区的商品和货物, 实行的四十天隔离检验, 以确保瘟疫不会入境。

However, the board was unable **to carry out** 实施；执行 most of these measures.
It was opposed (v.) mainly by landlords and merchants, who worried that /主 measures 后定说明 **to reduce (v.) overcrowding** 过度拥挤 and **improve (v.) sanitation** 公共卫生，环境卫生 系 would be too expensive /and who often **justified (v.)证明.....正当；为.....辩护 their arguments** by **pointing to** the colonial government’ s historical promise (n.) *to let (v.) the Chinese keep (v.) their own customs*.

主要反对者是地主和商人，他们担心, 减少过度拥挤 和改善卫生条件的措施, 成本过高，并且常常以"殖民政府有过让华人保留自身习俗的历史承诺"为由，为自己的论点辩解。

Example 9. 案例

Europeans generally dismissed this resistance to the government’s plague measures as xenophobia, superstition, and hostility toward Western medicine, but the situation was considerably more complex.
Like most colonial governments, the Hong Kong government had never taken such an interventionist role in colonial medicine and public health.
Until the mid-1800s, colonial medicine had been concerned mainly with protecting Europeans from the harmful effects of their tropical environments.
Only after the bacteriological revolution of the late 1800s was disease associated with contagious persons rather than with unhealthy tropical environments.
In response to an 1882 report by Osbert Chadwick, an engineer sent by the British government to examine health and sanitary conditions in Hong Kong, in 1883 the colonial government established the Sanitary Board, which was given the power to inspect and disinfect private homes and to quarantine contagious persons in hospitals.
However, the board was unable to carry out most of these measures.
It was opposed mainly by landlords and merchants, who worried that measures to reduce overcrowding and improve sanitation would be too expensive and who often justified their arguments by pointing to the colonial government’s historical promise to let the Chinese keep their own customs. 欧洲人普遍认为, 香港民众对政府防疫措施的抵制是仇外心理、迷信和对西方医学的敌视, 但实际情况远比这复杂得多。与大多数殖民地政府一样, 香港政府此前从未在殖民地医学和公共卫生领域扮演过如此积极的干预角色。直到 19 世纪中期, 殖民地医学主要关注的是保护欧洲人免受热带环境的有害影响。直到 19 世纪末细菌学革命之后, 人们才开始将疾病与传染源联系起来, 而非与不健康的热带环境联系起来。1882 年, 英国政府派遣工程师奥斯伯特·查德威克（Osbert Chadwick）对香港的卫生状况进行了考察, 并提交了一份报告。1883 年, 殖民地政府根据这份报告成立了卫生局, 该局被赋予了检查和消毒私人住宅以及在医院隔离传染病患者的权力。然而, 卫生局却无力执行这些措施中的大多数。反对这项措施的主要人士是地主和商人, 他们担心减少人口过密和改善卫生条件的措施成本太高, 他们经常以殖民政府曾承诺让华人保留自己的习俗为由, 来为自己的观点辩护。

Furthermore, there was no reason *for the Chinese population* **to necessarily accept** (v.) the validity (n.)有效性；合理性 of the government’s plague measures.

To Europeans, the plague seemed to prove the latest theories about disease, for it appeared to be confined (v.) to the poorer and more crowded Chinese parts of town.

Although some colonial officials derided (v.)嘲笑；嘲弄 the Chinese for believing that /the plague **emanated (v.)产生；表现；显示;发源于；从…发出 from** the ground *after long periods of hot, dry weather*, Western medical theory had not yet established (v.)证实；确定 that /plague was transmitted (v.) by rats; most medical officials believed that /it was caused (v.) primarily 主要地 by poor hygiene 卫生；卫生条件 and overcrowding.

Example 10. 案例
deride

(v.) [VNV speech] **~ sb/sth (as sth)** : (formal) to treat sb/sth as ridiculous /and not worth considering (v.) seriously 嘲笑；愚弄；揶揄
SYN mock
•His views **were derided (v.) as** old-fashioned. 他的观点被当作旧思想受到嘲弄。

→ de-, 向下，强调。-rid, 嘲笑，词源同 ridiculous (可笑的，荒谬的), risible (可笑的；爱笑的；引人笑的).

Thus, the government’s antiplague (a.)防疫的 policies **focused (v.) mainly on** controlling (v.) and isolating (v.)隔离；孤立 the contagions (n.)传染病；蔓延；触染 of the disease: 主 the Chinese population (主 the *death rate* for infected (a.) Europeans 系 was substantially 很大程度上；本质上 lower **than** for Chinese).

主 The Sanitary Board 卫生局, now given more power, 谓 ordered (v.) troops to search (v.) homes, remove (v.) and burn (v.) corpses 尸体, and isolate (v.) plague victims 受害者；患者 in the Hygeia.

Many houses were burned down, **leading to** massive 大量的；大规模的 dislocation (制度、进程、生活方式的)紊乱；[医] 脱臼.

As the Chinese **were responding to** what they saw as *the government’s intrusive (a.)侵入的；侵扰的 policies*, their resistance 抵抗；反抗 was **both** rational 合理的；理性的 **and** *remarkably 显著地；非常地 similar to* responses (n.) in other colonial and noncolonial 非殖民的 societies.

当中国人对他们所认为的"政府干预性政策"做出回应时，他们的抵抗既合乎理性，又与其他殖民地和非殖民地社会的反应, 惊人地相似。

Example 11. 案例

Furthermore, there was no reason for the Chinese population to necessarily accept the validity of the government’s plague measures.
To Europeans, the plague seemed to prove the latest theories about disease, for it appeared to be confined to the poorer and more crowded Chinese parts of town.
Although some colonial officials derided the Chinese for believing that the plague emanated from the ground after long periods of hot, dry weather, Western medical theory had not yet established that plague was transmitted by rats; most medical officials believed that it was caused primarily by poor hygiene and overcrowding.
Thus, the government’s an-tiplague policies focused mainly on controlling and isolating the contagions of the disease: the Chinese population (the death rate for infected Europeans was substantially lower than for Chinese).
The Sanitary Board, now given more power, ordered troops to search homes, remove and burn corpses, and isolate plague victims in the Hygeia.
Many houses were burned down, leading to massive dislocation.
As the Chinese were responding to what they saw as the government’s intrusive policies, their resistance was both rational and remarkably similar to responses in other colonial and noncolonial societies. 此外, 中国民众没有理由必然接受政府的防疫措施。对欧洲人来说, 这场瘟疫似乎印证了当时最新的疾病理论, 因为它似乎只局限于华人居住的贫困拥挤的地区。尽管一些殖民官员嘲笑中国人认为瘟疫是在长期炎热干燥的天气后从地底滋生的, 但当时的西方医学理论尚未证实瘟疫是由老鼠传播的；大多数医学官员认为, 瘟疫主要是由卫生条件差和人口过度拥挤造成的。因此, 政府的防疫政策主要集中在控制和隔离疾病的传染源：华人（欧洲感染者的死亡率远低于华人）。卫生委员会权力扩大后, 下令军队搜查民宅, 移走并焚烧尸体, 并将瘟疫患者隔离在“海吉亚”（Hygeia）隔离区。许多房屋被烧毁, 导致大规模的流离失所。中国人对政府的干涉性政策做出了回应, 他们的抵抗既理性, 又与其他殖民地和非殖民地社会的回应惊人地相似。

The plague of 1894 had several important effects on Hong Kong society.

Although some Chinese leaders had helped *distribute (v.) medicine*, many colonial officials and European residents criticized (v.) **both** Chinese medicine **and** the Tung Wah Hospital.

In 1896, medical officials demanded that /the hospital be abolished 废除；废止. This prompted 促使；导致 an inquiry commission 调查委员会, which recommended 推荐，介绍；建议 that /the hospital 谓 be supervised 监督；管理 by the Medical Department, that Western medicine be offered *on a voluntary basis* 自愿地；基于自愿原则, and that a Chinese resident surgeon 住院外科医生 trained in Western medicine be appointed.

Example 12. 案例

This prompted an inquiry commission, which recommended that the hospital be supervised by the Medical Department, that Western medicine be offered on a voluntary basis, and that a Chinese resident surgeon trained in Western medicine be appointed.

我问: 这里为什么要用 be offered 之类? 而不是 was offered ?

虚拟语气 (Subjunctive Mood)
在动词 recommend (建议) 后的宾语从句中，谓语动词需使用"动词原形" (或 should + 动词原形) 来表示"虚拟语气"，这是正式英语 (尤其是美式英语) 的用法。**因此三个从句的谓语分别是 be supervised, be offered, be appointed。这表示这些是“建议”的内容，尚未成为事实，**体现了建议的“非现实性”和“强制性”。

```
【主句】 This prompted (v.) an inquiry commission
│
├─ 主语：This

```

In 1897, the government appointed (v.) a Chinese steward 管理员；监管人 to oversee (v.) the sanitation 公共卫生，环境卫生；卫生设施 of the hospital.

As 主 the resistance (v.)抵抗；反对 to the government’s plague measures 谓 seemed to prove (v.) 主 *how little the Chinese population 谓 understood (v.) Western ideas of health and sanitation*, Europeans and some Chinese elites 谓 demanded (v.) more English in schools.

由于对政府鼠疫措施的抵制, 似乎证明了中国人对"西方健康和卫生观念"的了解是多么少，欧洲人和一些中国精英要求, 在学校里教授更多的英语。

The plague also reaffirmed (v.)重申，再次确认 many Europeans’ conviction 坚定的信念；确信 后定说明 that they needed to stay (v.) **as *far away* as possible** from the Chinese.

Example 13. 案例

The plague of 1894 had several important effects on Hong Kong society.
Although some Chinese leaders had helped distribute medicine, many colonial officials and European residents criticized both Chinese medicine and the Tung Wah Hospital.
In 1896, medical officials demanded that the hospital be abolished.
This prompted an inquiry commission, which recommended that the hospital be supervised by the Medical Department, that Western medicine be offered on a voluntary basis, and that a Chinese resident surgeon trained in Western medicine be appointed.
In 1897, the government appointed a Chinese steward to oversee the sanitation of the hospital.
As the resistance to the government’s plague measures seemed to prove how little the Chinese population understood Western ideas of health and sanitation, Europeans and some Chinese elites demanded more English in schools.
The plague also reaffirmed many Europeans’ conviction that they needed to stay as far away as possible from the Chinese. 1894年的鼠疫对香港社会产生了诸多重要影响。尽管一些华人领袖曾协助分发药品, 但许多殖民地官员和欧洲居民却对中医和东华医院都持批评态度。1896年, 一些医疗官员要求解散东华医院。这促使当局成立调查委员会, 该委员会建议由卫生部门监管东华医院, 西医治疗应以自愿为原则, 并任命一位接受过西医培训的华人驻院外科医生。1897年, 政府任命了一位华人管事负责医院的卫生工作。由于民众对政府防疫措施的抵制似乎表明华人对西方健康和卫生理念的理解十分匮乏, 欧洲人和一些华人精英要求学校增加英语课程。这场鼠疫也更加坚定了许多欧洲人的信念, 即他们需要尽可能远离华人。

Still, the suppression 抑制；镇压 of the plague 系 was not a victory for **either** the colonial government **or** Western medicine.

Although local *colonial medical officials* criticized (v.) the Tung Wah Hospital for continuing (v.) to offer (v.) Chinese medicine, which **was dismissed (v.)不予考虑；摒弃；解雇 as** empiricism 经验主义 and quackery 庸医医术；骗术, the Colonial Office opposed 反对 any attempts to close the hospital.

Example 14. 案例
quackery

(n.)[U]the methods or behaviour of sb who pretends to have medical knowledge 江湖医术；庸医行径

→ 来自quack（（鸭子的）呱呱声，嘎嘎声),庸医。拟声词，模仿鸭的叫声。词义江湖郎中缩写自quacksalver,狗皮膏药，来自quack,叫卖，salver,油膏。

And even though by the end of the nineteenth century /half of the patients at the Tung Wah Hospital were choosing Western medicine, 主 the *fatality (n.)死亡 rate* for these patients 系 was initially 起初；最初 higher **than** for those who chose Chinese medicine.

The Hong Kong plague was also probably **responsible (a.)（对事故、错误、罪行等）负有责任的 for** the one 后定说明 that afflicted (v.)使受苦；折磨 India in 1896–1900.

香港鼠疫, 也可能是1896年至1900年侵袭印度的鼠疫的罪魁祸首。

As in Hong Kong, part of the Western-educated Indian middle class was **critical (a.)批评的；挑剔的；至关重要的 of** the way that hospitalization 住院治疗；医院收容 and segregation 隔离；分离 were carried out 实施；执行.

Example 15. 案例
critical

(a.) **~ (of sb/sth) :** expressing disapproval of sb/sth and saying what you think is bad about them 批评的；批判性的；挑剔的

•a critical comment/report 批判性的评论/报道
•The supervisor is always very critical. 主管总是很挑剔。
•Tom’s parents were highly **critical (a.) of** the school.汤姆的父母对学校提出了强烈的批评。

As in Hong Kong, all kinds of rumors spread (v.), although in India they were compounded (v.)使加重；使恶化；混合 by rumors of general catastrophe 大灾难；灾祸 and the collapse of British rule: inoculation 接种；注射疫苗 brought (v.) instant death, hospitals were poisoning (v.) victims and cutting up bodies to extract (v.) their momiai (vital oil 精油), and even healthy people were being hospitalized 送…住院治疗 and would never leave alive.

和香港的情况一样，各种谣言四处传播，不过在印度，这些谣言还夹杂着关于大灾难和英国统治崩溃的说法：接种疫苗会导致立即死亡，医院在毒害患者并肢解尸体以提取他们的“木乃伊油”（一种生命精油），甚至健康人被送进医院后就再也无法活着出来。

Only after widespread (a.) resistance 抵抗；反抗；抵抗力 from the Indian population /did the colonial government agree (v.) to end (v.) or modify 修改；更改；修饰 some of the more coercive (a.)强制的；强迫的 plague measures.

Example 16. 案例

Still, the suppression of the plague was not a victory for either the colonial government or Western medicine.
Although local colonial medical officials criticized the Tung Wah Hospital for continuing to offer Chinese medicine, which was dismissed as empiricism and quackery, the Colonial Office opposed any attempts to close the hospital.
And even though by the end of the nineteenth century half of the patients at the Tung Wah Hospital were choosing Western medicine, the fatality rate for these patients was initially higher than for those who chose Chinese medicine.
The Hong Kong plague was also probably responsible for the one that afflicted India in 1896–1900.
As in Hong Kong, part of the Western-educated Indian middle class was critical of the way that hospitalization and segregation were carried out.
As in Hong Kong, all kinds of rumors spread, although in India they were compounded by

rumors of general catastrophe and the collapse of British rule: inoculation brought instant death, hospitals were poisoning victims and cutting up bodies to extract their momiai (vital oil), and even healthy people were being hospitalized and would never leave alive. Only after widespread resistance from the Indian population did the colonial government agree to end or modify some of the more coercive plague measures. 然而, 灭鼠行动对殖民政府和西方医学而言都并非胜利。尽管当地殖民医疗官员批评东华医院继续提供中医治疗, 认为中医是经验主义和庸医, 但殖民地事务部却反对任何关闭该医院的企图。即便到 19 世纪末, 东华医院一半的病人选择了西医, 但这些病人的死亡率最初仍高于选择中医的病人。香港的鼠疫很可能也是 1896 年至 1900 年印度鼠疫的源头。与香港的情况类似, 部分受过西方教育的印度中产阶级对当时的住院治疗和隔离措施持批评态度。与香港一样, 各种谣言四起, 但在印度, 谣言更加甚嚣尘上, 充斥着关于灾难降临和英国统治崩溃的种种传言：接种疫苗会导致立即死亡, 医院毒害受害者并肢解尸体以提取其“生命之油”（ momiai ）, 甚至连健康人也被送进医院, 而且永远无法活着离开。只有在印度民众的广泛抵抗之后, 殖民政府才同意停止或修改一些更具强制性的瘟疫防控措施。
