- (101.) The correlation of carbon dioxide with temperature, of course, does not establish whether changes in atmospheric composition caused the warming and cooling trends or were caused by them.

当然，二氧化碳与温度之间的关联，并不能确定大气成分的变化，是导致变暖和变冷趋势的原因，还是这些趋势所造成的结果。

当然，（二氧化碳与大气温度之间的）相互联系，并不能确定到底是（大气成分的）变化，引起了气温的变暖和变冷的趋势，还是（大气成分的变化）就是由气温的冷暖变化造成的。
