

069

- (069.) They are called virtual particles 虚粒子 in order **to distinguish** (v.) 区分；辨别 them **from** real particles 实粒子, whose lifetimes 寿命 are not constrained 限制；约束 in the same way 以同样的方式, and which can be detected 探测；检测.

Example 1. 案例

- (069.) They are called virtual particles in order to distinguish them from real particles, whose lifetimes are not constrained in the same way, and which can be detected.

它们被称为虚粒子，是为了将它们与实粒子区分开来，实粒子的寿命不受同样的限制，并且可以被探测到。

real particles 后面跟着两个定语从句，都是同时修饰 real particles 的。而且两个从句之间还用逗号隔开，却又加上 and 连接。
