$$\log_{\mathbb{R}^{I}} \mathbb{R}^{I} \cdot \log_{\mathbb{R}^{I}} \mathbb{R}^{2} = \frac{\log_{\mathbb{H}^{\hat{\mathbb{R}}}} \mathbb{R}^{I}}{\log_{\mathbb{H}^{\hat{\mathbb{R}}}} \mathbb{R}^{I}} \cdot \frac{\log_{\mathbb{H}^{\hat{\mathbb{R}}}} \mathbb{R}^{2}}{\log_{\mathbb{H}^{\hat{\mathbb{R}}}} \mathbb{R}^{I}}$$

$$= \frac{\log_{\mathbb{H}^{\hat{\mathbb{R}}}} \mathbb{R}^{2}}{\log_{\mathbb{H}^{\hat{\mathbb{R}}}} \mathbb{R}^{I}}$$

 $= \frac{1}{\log_{\text{任意底}} \text{底} 1}$ $= \log_{\text{底} 1} \text{幕} 2 \leftarrow \text{即} \log_a b \cdot \log_b C = \log_a C$

即 $\log_a b \cdot \log_b C = \log_a C$ 你可以这样记忆: $\log_a b \cdot \log_b C = \log_a C$
